

Social Care Future animation – Alt Text Comic Strip version

This is a scene-by-scene version of Social Care Future’s animated short, with Alt Text.

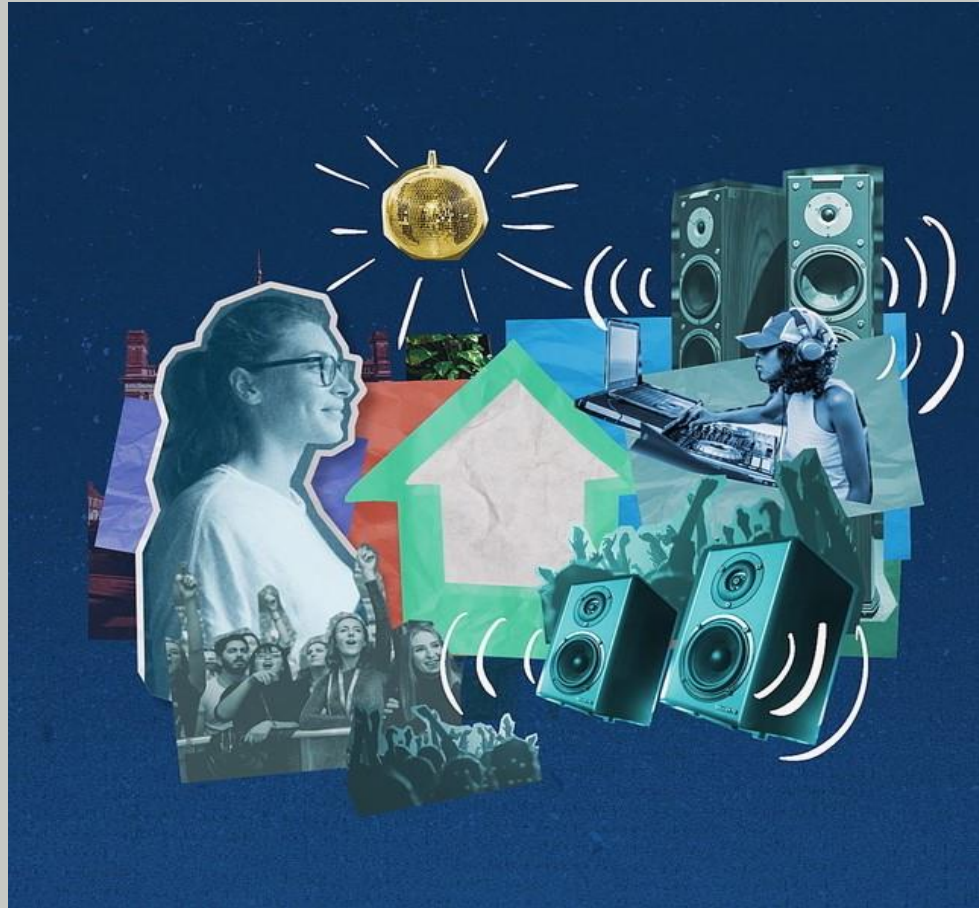

We all want to live in the place we call home....

...with the people and things that we love...

...in communities where we look out for one another...

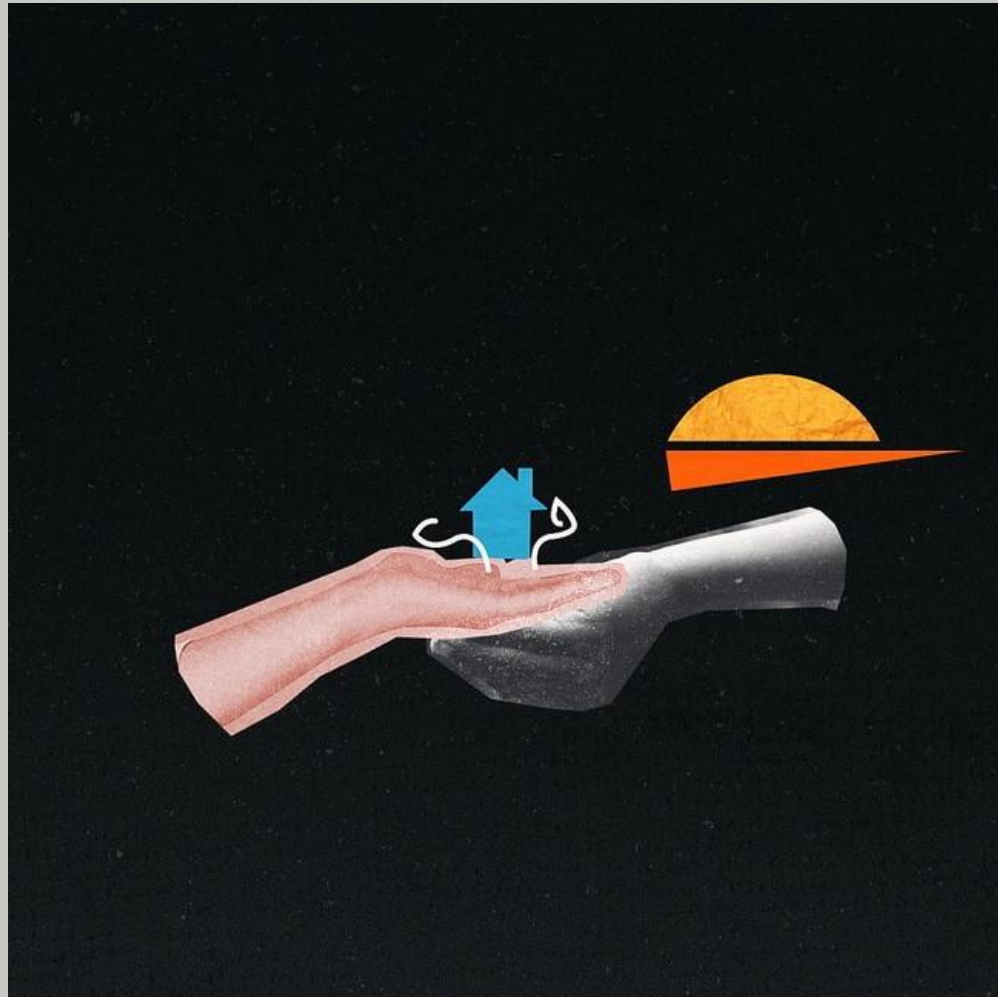

...doing the things that matter to us...

...but for many this is not the reality today and without big changes to the way we think about social care...

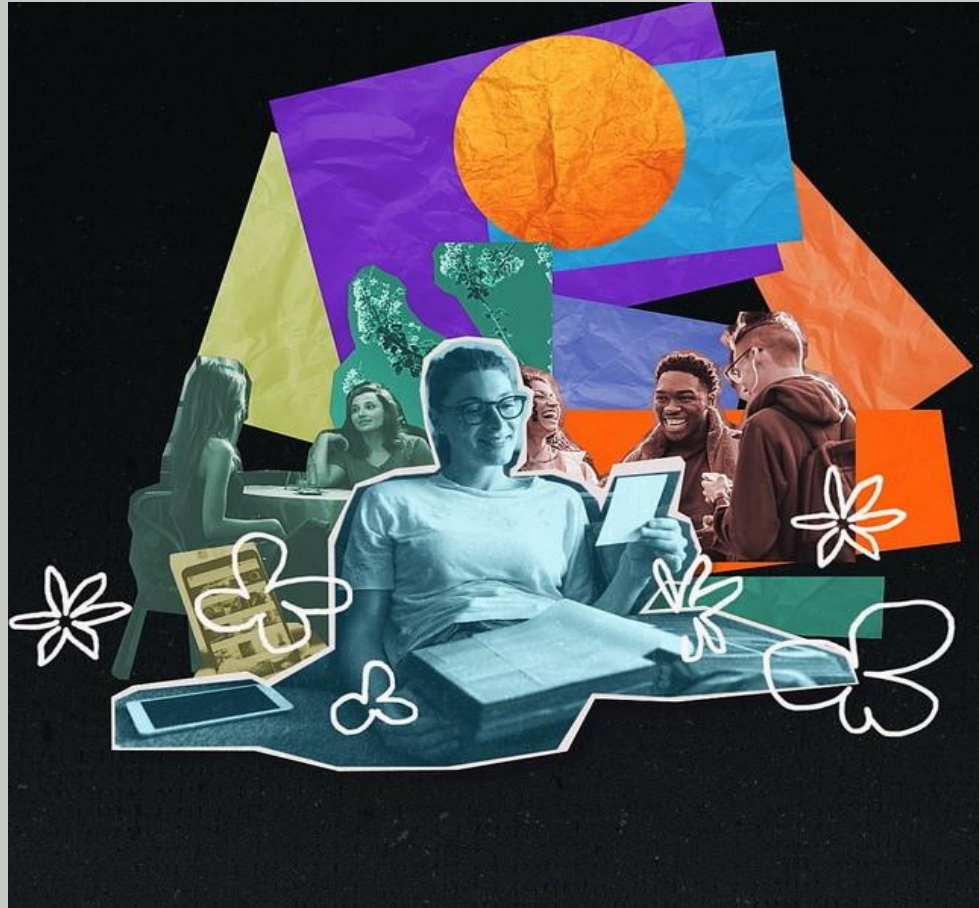

...many more of us risk losing control over our lives and contact with the things that make our lives worthwhile.

It doesn't have to be this way!

At its best, social care helps us to find, grow and weave together....

...the people, places and resources that we can draw upon....

...to live where we choose in the way that we want to, with meaning, purpose, and a sense of belonging at every age and stage of life....

..realised through innovative approaches like circles of support, shared lives and gigs and sports buddies.

We need this to be the reality everywhere and for everyone. To this our government must invest in social care....

...and our local councils must work with the people they serve so that creative approaches can take root and begin to thrive.

Let's start growing this Social Care Future together for all our futures. Share this video and join our movement for change.
